The **U.S. Census** is taken every 10 years and gives information about population, housing, education, and race. Every household fills out a short survey. **American Community Survey** gives updates about the American population annually by sampling a small percentage of the population every year. Economic, business and geographical data can be easily located by clicking the tabs at the top of the page.

At the bottom of the U.S. Census homepage you will find an index to the site.
Easy Stats

http://www.census.gov/easystats/ is an interactive tool that helps you locate information about where you live as well as statistics from across the US. Find racial, age, economic, education, housing, employment info and more.

**American Community Survey** gives sample estimates, population characteristics, for a period of time and samples a small percentage of the population every year. Information about households is collected online or via mail, telephone or personal visit. It covers social, economic, housing and demographic characteristics. In 2013 a new question was added for Computer ownership/internet access.
